WEDNESDAY, AUGUST 17. 1743.

Yesterday arriv'd a Mail from Flanders

Vienna, August 10.

WE have for a long time flatter'd ourselves, that through the Interposition of his Britannick Majesty, the Elector of Bavaria will be brought to have some Sense of his true Interest; but we now absolutely despair of it. Instead of dividing his Concerns from those of France, he has enter'd into closer Engagements with that Crown than ever; in Consequence of which, he has received lately a very considerable Remittance from Paris, and, we are told, that both his most Christian, and his most Catholick Majesty, have given him the strongest Assurances, that they will support him; the Reason of which is very evident, viz. in hopes of preventing the Empire from taking a Share in the War, which, after all, may not be, perhaps, in his Electoral Highness's Power. The Queen, our Sovereign, has issued Orders to restrain Rejoicings upon her Delivery, in case she is brought to bed of a Prince, to one Day only.

Hamburgh, August 16. Strict Orders have been issued to all the Captains of Vessels cruizing at the Mouth of the Elbe, to visit, without Distinction or Partiality, all Vessels coming from Sicily, Naples, and Smyrna, in order to oblige them to conform exactly to the Rules prescribed by our Government, for the Security of our Health; in Consequence of which, a Ship richly laden from Smyrna, and that hovered lately upon the Coasts of Britain, has been obliged to perform a rigorous Quarantine, notwithstanding she had a Dutch Passport. We hear from Berlin, that the King of Prussia has order'd 4000 Men in Silesia, to hold themselves in Readiness to march at an Hour's Warning. The same Letters say, that this Monarch intends to have an Army of 50,000 men shortly in Pomerania, at the same time that the Empress of Russia is augmenting her Forces in Finland; but with what View these Preparations are made, does not appear. We are surprized to hear, that the extraordinary Armament in Denmark is made with the Consent, and even in Concert with the King of Great Britain; and that four Regiments of Foot, and two of Horse, in British Pay, of that Nation, have had Orders to hold themselves ready to march. We have this Moment Intelligence, that the Czarina intends to increase her Forces in Courland to 35,000 Men.

Hague, August 23. The Partizans of France and Spain, who are now without Resources, have lately talk'd of a new Project, which certainly argues great Fertility of Invention. In short, they would have us not only believe that all Differences between the Courts of Madrid and Turin are adjusted, but insist farther, that an offensive and defensive Alliance is on the Point of being concluded, if it is not so already, between the Crowns of France, Spain, Naples, Sardinia, and the Duke of Modena, in order to share amongst them the Dominions of the House of Austria in Italy. In order to be even with them, the Austrians talk of as strange an Alliance; they pretend, that Spain will join the Allies against France; that Don Philip is to have Tuscany; that Lorrain is to return to its old Master; and that Alsace is to be conquer'd for the Emperor, and his Successors. With these Stories we amuse ourselves till the Armies pass the Rhine, and furnish us with something better.

THE Elements of ALGEBRA, in a New and Eaſy Method; with their Uſe and Application, in the Solution of a great Variety of Arithmetical and Geometrical Queſtions, by General and Univerſal Rules.

To which is prefix'd, An Introduction containing a ſuccinct Hiſtory of this Science.

By Mr. NATHANIEL HAMMOND, *of the* Bank.

Extract from the Account of this Book in the Works of the Learned.

'The World has long complained of the Want of a proper Introduction to Algebra. Some are ſo very conciſe, as if they were contrived not to teach but introduce a Teacher; others again are larger, but wrote with ſo little Condeſcention to the Underſtandings of ſuch as are altogether unacquainted with the Science, that they are of very little Uſe to thoſe who are moſt inclined to make uſe of them. Whence it comes to paſs, that few find it practicable to make any Progreſs in Algebra without a Maſter, tho' certainly the Science in itſelf is far from ſurpaſſing a clear Head, and a tolerable Underſtanding.

'The Deſign of this Treatiſe, which is of a reaſonable Bulk, and which contains nothing which is not ſolid, and to the Purpoſe, is to aſſiſt ſuch as are engaged in teaching Algebra with a regular Method, and a large Stock of Examples; ſo that their Scholars may find Employment in their Abſence, and to enable ſuch as live in Country-Places, and muſt conſequently want all other Tutors, except Books, to acquire ſuch a Skill in this Science, as may enable them to ſpend a Portion of their Time agreeably in the Cultivation of their better Parts, and in rendering a natural Method of enquiring after Truth habitual.

'The Treatiſe begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation uſed therein. The Author then proceeds to the ſeveral Rules, explaining them carefully and copiouſly in all their various Caſes; ſo that with a moderate Attention it is ſimply impoſſible for a Perſon, who deſires to be Maſter of Algebra, to miſs of his End.

'We never find this Writer advancing any thing out of its proper Place, or burthening the Mind of his Scholar with Rules, before they become neceſſary: He profeſſes to have imitated the judicious *Euclid* in this Reſpect; and he has done it with equal Art and Felicity. By this means he has delivered the young Student in Algebra from that which is uſually the moſt fatiguing Part of the Science, viz. The Doctrine of Surds, in the Manner in which it is uſually taught. By the ſame Means he leads his Reader directly to Equations; and, by ſhewing him the Profit he will reap from this Science, encourages him to overcome all its Difficulties. But having thus laid a ſtrong and rational Foundation, he moves more ſlowly through the reſt of his Work, that whoever follows him, may be obliged to become Maſter of every Branch of the Art, ſo as to be a compleat Algebraiſt, before he quits his Book, and not a Smatterer.

'Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the uncomparable *Newton*, are here ſo clearly explained, and their ſeveral Caſes ſo plainly ſet down, and ſo thoroughly explicated, that it may be truly ſaid, there are no where elſe ſuch Inſtructions to be met with. At the Cloſe of the Book, we find abundance of Obſervations, neceſſary for enlightening ſuch Minds as are willing to proceed ſtill farther in analytic Diſcoveries; ſo that conſidering the Compaſs of this Work, and that too is very moderate, it is as complete as poſſibly can be expected: And he who is thoroughly verſed in it, will find no great Difficulties, when he proceeds to ſublimer Studies. The Language is plain and natural, the Book is more copious than any other in Examples, and the Illuſtrations of them are ſo full and clear, that it is impoſſible to miſtake their Meaning.——'

7. PHOENIX BRITANNICUS. Being a Miſcellaneous Collection of above 70 Scarce and Curious TRACTS, Hiſtorical, Political, Biographical, Satirical, Critical, &c. Interſperſed with ſome choice Original Manuſcripts. Collected into One Volume.

WHereas WILLIAM PENNY, Apprentice to ISAAC SPURRIER, Snuff Box Maker, in Salisbury-Court, Fleet-ſtreet, did abſent himſelf from his ſaid Maſter's Service on Friday Night laſt; This is to warn all Perſons from harbouring or entertaining him, for they will be proſecuted to the utmoſt Severity of the Law. Or whoever ſhall diſcover him, and bring him to his ſaid Maſter, ſhall have Two Guineas Reward, with reaſonable Charges, from me

Iſaac Spurrier.

It is apprehended, That he was enticed away by ſome ill-principled Perſon or Perſons; This is therefore to inform him, that if he will return, and diſcover the Perſon or Perſons that did ſo entice him, he ſhall be kindly received, and have the above mentioned Two Guineas as a Reward for the Diſcovery.

He is a tall thin Lad, about 5 Foot 7 Inches, aged 18 or 19 Years of Age, a little battle-headed, and of a ſwarthy Complexion, and is remarkable for having a bald Place on one Side of his Head. He had on when he went away, a dark Gray Baragon Coat, with broad White Metal Buttons, a dark Brown Bob Wig, and Leather Breeches; and took with him a light Drab Coat with White Broad Metal Buttons, and a Duffil Coat with yellow Metal Buttons, and a narrow Velvet Cape.

An Infallible and Inſtant Cure
For DEAFNESS, THICKNESS *of* HEARING, PAIN *or* NOISE *in the* EARS, &c. *by the true Chymical Specifick* DROPS.

WHICH infinitely excel all other Medicines ever offer'd to the Publick, or known in the World; for they directly cure Deafneſs, be it ever ſo bad, and all Thickneſs of Hearing and Noiſe in the Ears, almoſt at once, and that after all other Means have failed, and without Trouble, or the leaſt Uneaſineſs whatever, as many Thouſands have experienced.

They effectually remove all Pain occaſion'd by Cold, ſtrengthen the Tympanum or Drum of the Ear, free the auditory Nerves from Obſtruction, and remedy all Defects of the Hearing Faculty, moſt in an inſtant, cauſing thoſe to hear exceeding quick and well, who before were in a Manner totally Deaf.

Hundreds who were ſo very bad, as not able to hear a Drum when beat cloſe by them, and therefore deſpaired of being ever relieved, have been quickly and perfectly cured by them, to their great Joy and Admiration.

In a Word, nothing in Nature can come near them for the eaſy and almoſt immediate Cure of DEAFNESS proceeding from what Cauſe ſoever; but the great Eſteem and Reputation they are juſtly gained for many Years paſt, have occaſion'd (as uſual in ſuch Caſes) many Counterfeits to come abroad; beware therefore of ſuch Impoſitions, theſe excellent and only true Specifick Drops being to be had only, by the Author's Appointment, of the Gentlewomen at the two Blue Poſts in Haydon-Yard, in the Minories, at 3 s. 6 d. a Bottle, with Directions, and no where elſe in England.

Concerning Gleets *and* Seminal Weakneſs *of all Kinds.*

ALL judicious Phyſicians and Surgeons allow, that nothing is more difficult to cure than Stubborn Gleets and Seminal Weakneſſes, whether occaſion'd by too ſevere purging for Venereal Injuries, violent Strains, Poluti uſui, or any other Cauſe whatever; and that they are dangerous in their Conſequences, as well as difficult to cure, is as certain, ſince they exceedingly waſte the Generative Faculties, infeeble the whole Nervous Syſtem, often bring on Hectick Heats, a Tabes Dorſalis, or Conſumption of the Back, or an Atrophy or Nervous Conſumption, which frequently terminate in Death itſelf.

All ſuch, therefore, who have the Misfortune to be troubled with Old or Stubborn Gleets, Seminal Effuſions, Involuntary Emiſſions, exceſſive Nocturnal Pollutions, or any Weakneſs of the Kidneys, Ureters, or Bladder, the Diabetis, or Incontinency of Urine, or Difficulty of holding their Water, would doubtleſs be glad to meet with a certain, ſafe, and ſpeedy Cure, which they moſt aſſuredly may, by taking only a ſmall Quantity of a tranſcendent BALSAMICK RESTRICTIVE ELECTUARY, now publiſhed for a general Good, after having for many Years been experienc'd never once to fail perfectly curing the moſt Stubborn Gleets known, in a few Days, without Difficulty or Trouble; as alſo all other Weakneſſes of the Back, Reins, Seminal Veſſels, and Urinary Paſſages, whichit almoſt inſtantly cures, bringing to rights and reſtoring all thoſe Parts and Paſſages to their natural Tone and priſtine Vigour, in a very extraordinary Manner, and by taking a few Doſes of it only.

This tranſcendent BALSAMICK RESTRICTIVE ELECTUARY is neither diſagreeable to take, nor occaſions the leaſt Diſorder, but is a wonderful Reſtorative in all Weakneſs and Decay of Conſtitution of any Kind, and particularly ſtrengthens the Back, Reins, Seminal and Urinary Veſſels to an immenſe Degree, inſomuch that in any Debility of them, one Doſe of it does more than ten of any other Remedy yet found out; and all Perſons fatigu'd with Gleets or Seminal Weakneſſes of any Sort, or Weakneſſes of the Urinary Veſſels, who take it, will in three Days time find it ſo very effectual, that they will be moſt agreeably ſurpriſed at it.

When a Medicine will infallibly accompliſh ſuch a fair, ſpeedy and perfect Cure of ſuch difficult Maladies, as Gleets and Seminal Weakneſſes are, as this Great Remedy truly and directly will, even after all other Means and Medicines have been tried in vain; too much cannot be ſaid in it, and this All who ever took it for any of the above-mention'd Purpoſes, have readily declared.

The Price is but 6 s. a Pot, altho' for its abſolute Efficacy one Pot alone being ſufficient in moſt Caſes to accompliſh a Cure, worth ten times as much, and by the Author's Special Appointment, is to be had only at Mr. Raſhin's Toy-ſhop, at the Roſe and Crown againſt St. Clement's Church-Yard in the Strand, ready ſealed up, with a Book of Inſtructions, which whomſoever carefully reads will perfectly know, when the Gleet or Weakneſs he is afflicted with, ſucceeds a Venereal Injury, whether all the Malignity of the Foul Diſeaſe is intirely eradicated or not.

Note, Ask only for a 6 s. Pot of Baliamick Electuary.
